JOIN US!

WHO ARE WE LOOKING FOR?

- a student or university graduate of Computer Science (but not necessarily), ideally available for at least 20h weekly
- proficient English speaker (C1 level or above)
- a candidate with a passion for programming and improving people's lives by developing great software
- a strongly motivated person who persistently looks for new challenges and opportunities for further development, not afraid to take ownership and search for solutions
- previous experience with a modern programming language
- experience in Cloud deployments is seen as an asset

WHAT ARE WE OFFERING?

- flexible working hours
- a paid 6-month internship (to be potentially extended to up to 1 year)
- work closely with and learning from AWS experts and trainers
- work with the full development and devOps toolset including BitBucket Jenkins
- be in communication with a wider team that is setting the best practice standards in IT
- attend training sessions on the latest innovations from AWS, SnowFlake other data platforms and tools and in company experts in the following subject areas (Backend, Frontend, Infrastructure, Integration, IoT, QA, Data, Architecture)

HOW WILL YOU MAKE HISTORY WITH US?

- become a part of a multifunctional team developing and managing an enterprise data platform with hundreds of international customers
- Customer support and agile project management using the Atlassian suite
- Platform architecture design, code review and quality assurance
- AWS Lambda development in Python
- AWS resource provisioning using CloudFormation, CodeBuild, Code Pipeline and Terraform
- Application security, building REST APIs with MuleSoft
- Optionally: web application design and development in JavaScript, the management of Windows applications running on EC2 and work with Data platforms such as AWS Glue, Apache Spark, SnowFlake
