JOIN US!

WHO ARE WE LOOKING FOR?

- Fresh graduates (up to 6 months after graduation) or students with at least two years of studies completed in Computer/Data Science, Cybersecurity, Electronics/Telecommunications Engineering or equivalent,
- Available for at least 30-40h per week (possibility of flexible working hours upon agreement with a manager),
- With good written and oral communication skills in English,
- Interested in IT security, computer networks and systems architecture, curious about web and mobile application security,
- With a basic understanding of key security concepts (e.g. access management, continuity, secure communication),
- With a basic understanding of cloud computing architectures (e.g. SaaS, IaaS, PaaS) and their corresponding characteristics in terms of information security (AWS, Microsoft Azure), basic knowledge of common web/mobile development technologies would be an asset,
- Knowledge about modern application architectures including microservices, containers, APIs and serverless technologies and knowledge about data privacy regulations and practices (e.g. GDPR) would be an advantage.

WHAT WE OFFER YOU?

- Internship for duration of 6 that can be extended up to 12 months,
- Daily contact with people from all around the world,
- A chance to see the nature of corporate world,
- Possibility to practice your language skills each day.

HOW WILL YOU MAKE HISTORY WITH US?

- Support development teams in understanding applicable internal and external information security requirements and efficiently embedding them in the new systems deployments or operation of existing systems,
- Take part in security assessments of applications and systems from multiple perspectives (overall architecture, data flows, integration with external systems, compliance with the best standards),
- Raise awareness across the organization by delivering trainings, webinars, or similar activities to reduce the number of repeated application security weaknesses and technical vulnerabilities.
