JOIN US!

WHO ARE WE LOOKING FOR?

- 4th-5th year students or fresh University graduate up to 6 months after graduation with educational background in Finance/Economics/Mathematics/Econometrics or STEM, ideally, available for at least 20-30 hours per week
- proficient English speaker, proficient in Excel and open to work in new applications/tools
- an analytical problem-solver, brave enough to challenge the 'status quo', able to read data quickly and draw conclusions from them in an unbiased way and to communicate them in a clear way
- self-motivated team player – data analytics requires cross-functional collaboration to move from concept to real data driven products
- any basic experience of BI tools (Power BI/Tableau) and scripting languages (VBA/SQL/R/Python) or strong willingness to learn
- basic understanding/knowledge of modern statistical and machine learning or agile project management methodologies would be considered as a huge asset

WHAT WE OFFER YOU?

- become a member of a Data & Analytics Team, learning and building experience in the field,
- have a possibility to strengthen your experience in a diversified environment, cooperating with business partners from various geographies and representing different businesses
- take part in various exciting global, data-driven projects
- take the opportunity to learn foundations of Business Intelligence & advanced data analytics tools and project management techniques around them (we provide necessary materials and dedicated support for you)
- support of expert colleagues working in a 'no-judge' environment (we do not assume you are fully knowledgeable with all systems or tools but you must be hungry for development and improvement)
- internship for duration of 6 month that can be extended up to 12 months

HOW CAN YOU MAKE HISTORY WITH US?

- bring in your academical knowledge and transform it into real products solving business problems
- go through the data analyst development path: from reading & understanding data through developing own solutions ending up on leading own initiatives and projects

- participate in a variety projects by sharing a point of view in analytics (f.eg. reading data accurately, getting right assumptions, answering business questions) and/or by developing own tools
- as a matrix organization we will offer you an opportunity to meet the newest trends & tools in Business Intelligence, Data Science and Project Management
- try yourself in various tasks and decide what you feel the best at, either you can go into fully data analytics path or into project management one, and we'll be here to support you!
